Safe driving skills are based on ability, not age

If you or someone you know:
» Has trouble seeing or reading street signs
» Has a hard time with parking
» Has anxiety about driving
» Finds it physically difficult to drive safely
» Takes medication that could make them sleepy or dizzy
» Forgets how to get to familiar places

Plan a course of action:
» Take a refresher driving class
» Upgrade to a car with more safety features
» Look for other transportation options in your area

WARNING SIGNS
